

***ENCISION Inc.
Boulder, Colorado
OTC: ECIA***

***Eliminating deadly stray energy in Laparoscopic Surgery with
proprietary high performance surgical instrument system.***

Encision Inc. Disclaimer Statement

The following information does not purport to be all-inclusive or to contain all the information that you may desire for investing in Encision. You should conduct and rely on your own evaluation of Encision, including the merits and risks involved, in making an investment decision with respect to our shares. This document and our periodic reports filed with the SEC contain certain forward-looking statements that involve risks and uncertainties with respect to our business and our industry. Our actual results could differ materially from those included in forward-looking statements. Factors that could contribute to these differences include those matters discussed in the Risk Factors sections of our periodic reports filed with the SEC. We assume no obligation to update such forward-looking statements or to update the reasons that actual results could differ materially from those anticipated in such forward-looking statements.

Strong Need for Encision's AEM® Technology

- Approximately 8 million standard laparoscopic surgical procedures in the US in 2018. ~85% use Monopolar Surgical Energy to dissect tissues and create hemostasis.
- Stray Energy during Laparoscopic Surgical procedures kills 400-500 patients each year in the United States and severely injures approximately 7000.
- Encision's proprietary Active Electrode Monitoring (AEM®) Technology is the only guaranteed method to eliminate stray energy injuries intraoperatively.
- CMS is penalizing Hospital Systems with high Hospital Acquired Condition Scores

Encision saves patients' lives with Active Electrode Monitoring (AEM®) Technology

Value Driven Products, Proprietary Technology, Positive Trajectory

Forms of Stray Energy in Laparoscopy

Insulation Failure

Active Electrosurgical Electrode

Failure Rate:

1 in 5 – Reusables

1 in 33 – Disposables

SAGES 2005, 2007, Mayo Clinic
2008, Univ Colorado 2010

Capacitive Coupling

Active Electrosurgical Electrode and Cold Instrumentation

Capacitive Coupling

Active Electrosurgical Electrode

**Between 400-500 Patients die
each year from stray energy burns
(Fecal Peritonitis Post Operative Sepsis)**

Schroder F. Brady Urological Institute, Johns Hopkins Medical
Institutions, Baltimore, Maryland, USA.

Value Driven Products, Proprietary Technology, Positive Trajectory

Delivering Value

Clinical Value: AEM® Technology alone saves patient lives by eliminating stray energy burns during laparoscopy.

Economic Value: AEM® Technology alone reduces hospital liability by eliminating a source of surgical malpractice, reduces hospital risk of CMS penalties, and reduces costly readmissions and associated unreimbursed expenses.

Stray energy burns are not caused by surgical technique – they are a fundamental flaw in monopolar surgical energy

Value Driven Products, Proprietary Technology, Positive Trajectory

Where have we been?

Phase I - Turn Around

- **Operational Excellence**
 - Aggressive Cost Cutting
 - Process Optimization
 - Driving New Efficiencies
- **Bolstering the Product Portfolio and Sales Channel**
 - EM100 monitor quickly iterated to EM200
 - New ES5107 Cable
 - New EM3 Capital Monitor
 - Re-Established US Sales Channel
- **New Evidence** that substantiates the dangers of Stray Energy and the benefits of AEM[®] Technology

Value Driven Products, Proprietary Technology, Positive Trajectory

Where do we go from here?

Phase II - Drive Increased revenues from portfolio enhancements and increased sales presence.

Opportunities:

- New products for existing call points
- Iterate existing products for cost and aesthetic improvement
- Optimize US Channel and expand International Sales
- License opportunities
- OEM Manufacturing Opportunities

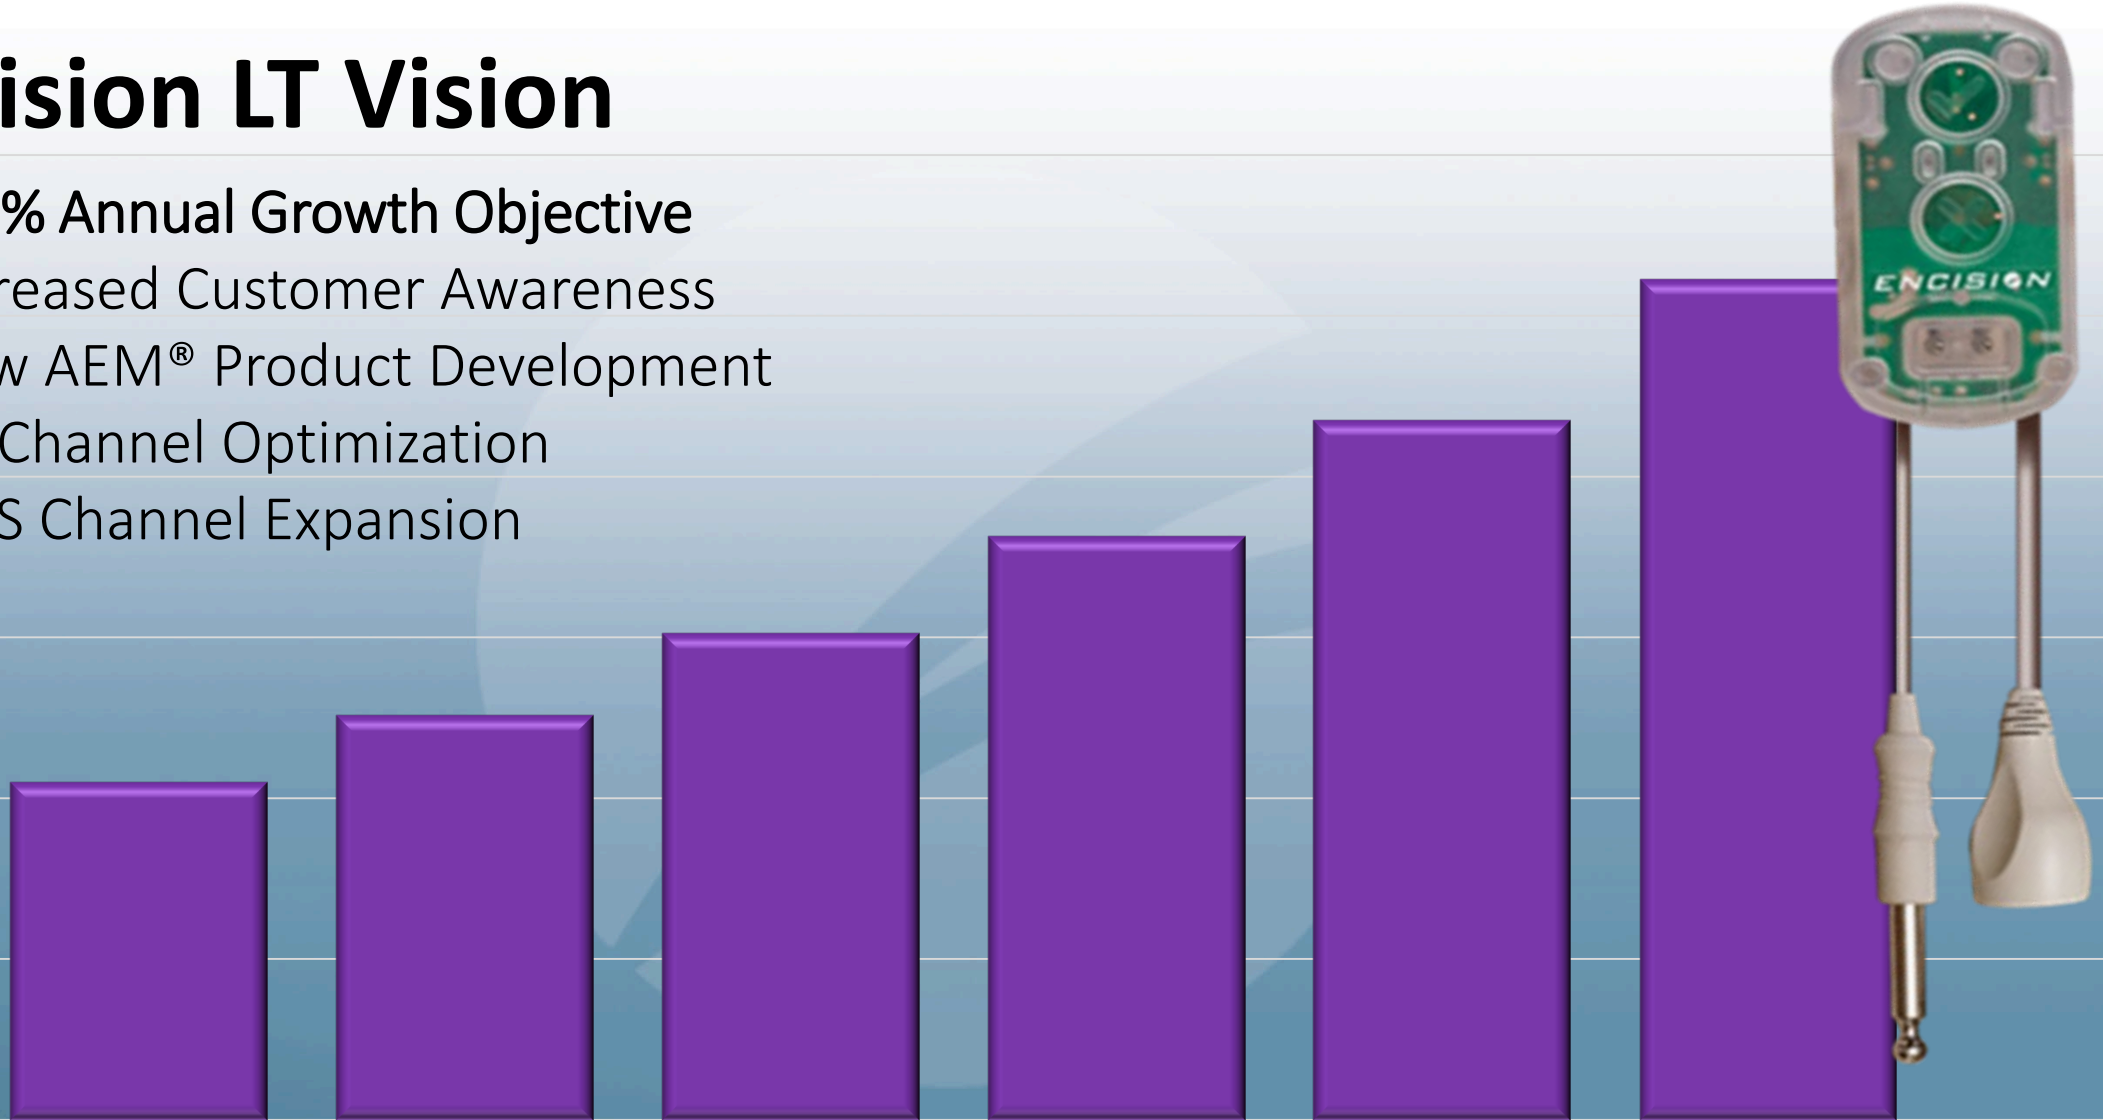

Value Driven Products, Proprietary Technology, Positive Trajectory

Encision LT Vision

10-15% Annual Growth Objective

- Increased Customer Awareness
- New AEM® Product Development
- US Channel Optimization
- OUS Channel Expansion

Value Driven Products, Proprietary Technology, Positive Trajectory

Thank You!

Encision

- Life Saving Technology
- Gaining traction in the market
- Operational excellence
- Driving revenues and profitability
- An attractive opportunity
